Class ring design under review

Committee to release official model later this month

Andrea Torres
THE RIDER

With graduation less than three months away, seniors are preparing to purchase their commencement cap and gown, and starting this semester, they can also buy the first UTRGV class ring.

"Definitely something that

looks very well-done," said Saire Moreno, a graphic design senior, about what she wants the ring to look like. "Definitely want for it to represent what I did in college."

As previously reported by *The Rider*, the UTRGV Official Ring Committee received more than 800 responses from a survey

asking for input on the ring design, which was administered on Feb. 5 by the Office of the Executive Vice President of Finance and Administration.

The survey was available until Feb. 19 and more than 70 percent of respondents were students, said Letty Benavides,

Anthropology freshman Kathia Rodriguez said she is nervous about the campus carry law, which took effect Aug. 1 throughout university campuses in Texas.

"I am not really good with having guns near me and since

they are concealed, I am more nervous," Rodriguez said.

Senate Bill 11 states that a license holder may carry a concealed handgun on the campus of an institution of higher education or private or independent institution of higher education in the state.

To obtain a license, applicants

must complete a course, said UTRGV Police Chief Raul Munguia.

"As far as applying for license, you do that through DPS," Munguia said. "You will end up having to take a safety course and then, you are going to demonstrate your proficiency

FAFSA available now

Nubia Reyna
THE RIDER

The 2017-2018 Free Application for Federal Student Aid (FAFSA) already is available, three months earlier than in previous years.

Additionally, students will use the 2015 income and tax information to fill out the application, according to fafsa.ed.gov. For example, on the 2017-2018 application, a student will report the 2015 income and tax information, rather than information from 2016.

The application became available on Saturday.

See **FAFSA**, Page 2

Musk: on Mars by 2024

Nubia Reyna
THE RIDER

SpaceX CEO Elon Musk plans on colonizing Mars by 2024 and making humans a "multi-planet species."

Musk spoke in front of an audience of more than 3,000 people at the International Astronautical Congress in Guadalajara, Mexico, last Tuesday. The address was live-streamed.

"What I really want to try to achieve here is to make Mars seem possible, make it seem as though it's something we can do in our lifetimes," Musk said.

The first spaceship to Mars, which is nearly 34 million miles from Earth, has not yet been finalized. The spaceship will have a diameter of 17 meters, or 55.77 feet. The ship will have a powerful rocket booster, which will separate from the craft and land back on Earth.

"Once that transport system is built, then there's a tremendous opportunity for anyone who wants to go to Mars and create something new or build the new

ELON MUSK

foundations of a new planet," Musk said.

The Interplanetary Transport System rocket booster would be taller, wider and three times more powerful than the Saturn V rocket, which transported astronauts to the moon. Each booster rocket would use 42 of SpaceX's Raptor rocket engines, and the passenger spaceship will only have nine raptors.

"It's quite big. ... I think in the long term, the ships will be even bigger than this," Musk said.

Once the booster lands, it will gear up for its next launch of a propellant tank. Then, the tank is going to dock with the spaceship in orbit filling it up with the gas needed to go to Mars. Musk said it will take three to four propellants to fill the tank with the gas needed to go to Mars.

In order to be a self-

ANNOUNCEMENTS

**Today
Resilient Leader Session**

The **Student Leadership Academy** will conduct a self-paced leadership development program from 4-5:30 p.m. in the Student Union Palmetto Room on the Edinburg campus. Admission is free. For more information, call 665-2660.

**Tuesday
Optometry Career**

The **Pre-Optometry Society** will discuss optometry, how to apply for optometry school, fundraising and volunteering ideas from 9:45 to 10:30 a.m. in Science Building Room 2.342 on the Edinburg campus. All students are welcome. Snacks will be provided.

Emerging Leaders Session

The **Student Leadership Academy** will host a class that challenges students to talk about their morals and values to ensure they are contributing a positive change in their community from 12:30 to 1:30 p.m. in the Student Union Palmetto Room on the Edinburg campus. For more information, call 665-2660.

Festival Dance Practice

The **Chinese Language and Culture Association** invites the campus community to join the group as it prepares for the Mid-Autumn Festival dance performance from 2 to 3 p.m. Tuesday, Thursday and Friday in the University Recreational Center on the Edinburg campus. Participants are encouraged to bring their own bottled water. For more information, call 665-2660.

Distinguished Speaker Series

Albert Manero, an engineering innovator, executive director and founder of **Limbitless Solutions**, which helps disabled youth by manufacturing and distributing 3D-printing prosthetic limbs, will speak at 7 p.m. in the UTRGV Performing Arts Center in Edinburg. Admission is free with a UTRGV ID. For more information, call **Student Involvement** at 665-2660.

Fish and Chips

The **Catholic Campus Ministry** invites UTRGV students to lunch at the Edinburg Chapel Lawn from 11:30 a.m. to 12:30 p.m. For more information, call 383-0133.

**Wednesday
Fall Career Expo**

The **Career Center** will host a **Fall Career Expo** from 10 a.m. to 2 p.m. in the Student Union's Gran Salón on the Brownsville campus. Dress professionally and bring your résumé. Student ID is required for registration. For more information, call 665-2243.

Breakfast to Go

The **Baptist Student Ministry** will provide refreshments to students from 8 to 9:30 a.m. at the Main East Front Lawn in Edinburg.

**Thursday
Blitz Thursdays Chess Tournament**

The **Chess Club** will host a rated **U.S. Chess Federation tournament** from 4:30 to 8 p.m. in Student Academic Center 1.112A. Beginners are welcome. No membership is required and members will teach you how to play. For more information, call (932) 908-5462.

Student/Employer Social

The **Career Center** will host a social where students can meet potential employers from 6 to 8 p.m. in the Student Union Commons in Edinburg. Snacks and drinks will be provided. For more information, call 665-2243.

**Friday
U.S. Navy SeaPerch Challenge**

Hispanic Engineering, Science and Technology Week will present the **U.S. Navy SeaPerch Challenge** from 7 a.m. to 3 p.m. at the Harlingen Consolidated Independent School District's Aquatics Center, located at 315 N. 77 Sunshine Strip. For more information, call 665-3361.

Fall Career Expo

The **Career Center** will host the **Fall Career Expo** from 10-3 p.m. in the Fieldhouse on the Edinburg campus. Dress professionally and bring your résumé. Student ID is required for registration. For more information, call 665-2243.

**Saturday
Community Day**

Hispanic Engineering, Science and Technology Week will conclude with **Community Day** from 3:45 to 9:30 p.m. on the Edinburg campus. The free event will feature concerts, speakers, hands-

on science activities and much more. Food will be sold by university student organizations. For more information, call 665-3361.

Chess Tournament

The **Chess Club** will host a scholastic/open chess tournament from 7 a.m. to 5 p.m. in the Student Academic Center on the Edinburg campus. The event is open to players from kindergarten through 12th grade. An open section for non-scholastic players will also be available. For more information, call (932) 908-5462.

League of Legends Tournament

The **eSport Association** will host a **uLoL 1v1** tournament from noon to 5 p.m. in Life and Health Sciences Building 1.402 on the Brownsville campus. The tournament will be run through Battlefly. Check-in time is 11:30 a.m. and the entry fee is \$5. Competitors must register through uLoL to compete: <http://ulol.na.leagueoflegends.com/>. Prizes will be awarded. For more information, call 639-5913.

**Food Sales
Pizza and drinks**

The **Japanese Animation Club** will sell pizza and drinks in the Health Affairs Building West Gazebo from 11:30 a.m. to 12:30 p.m. Tuesday For more information, call 371-3306.

Hotdogs

The **Student Association for Medical Spanish** will sell hotdog combos from 9 a.m. to 2 p.m. Wednesday in the front lawn of the Mathematics and General Classroom building in Edinburg. They will also have chili and cheese, drinks and chips.

Shaved Ice/Raspas

The **Collegiate Entrepreneurs' Organization** will sell Kona Ice from 11 a.m. to 1:15 p.m. Wednesday in the University City Ballroom lawn on the Edinburg campus.

Pizza

The **Rehab Club** will sell pizza in the front lawn of the Mathematics and General Classroom building from 11:30 a.m. to 1 p.m. Thursday
The **Health Occupations Students of America** will sell pizza from 11:30 a.m. to 1 p.m. Thursday in the Library CTY B.
--Compiled by Brenda Garza

POLICE REPORTS

The following are among the incidents reported to University Police between Sept. 19 and 25.

Sept. 19

8:17 a.m.: A student reported that another student came up to her in a parking lot on the Edinburg campus and told her that her boyfriend was no good. The student said she was not sure how the other student was able to find her.

11:03 a.m.: Two students and a UTRGV professor reported that two clarinets were missing from the instrument lockers at the Texas Southmost College Arts Center. The clarinets were last seen on Sept. 16 and have a combined value of \$4,000.

4:38 p.m.: A student reported his ex-girlfriend used a mutual friend's phone in order to contact him. He hung up the phone as soon as he realized it was his ex-girlfriend. A second call was received from the same number, but the student refrained from answering it. He later received a lengthy voice recording

from his ex-girlfriend, which she sent from their mutual friend's social media account. The student said he does not want to press charges against his ex, but wants the incident to be documented.

Sept. 22

6:26 p.m.: A student riding his bicycle was accidentally struck by a vehicle. The driver stopped and rendered aid. The student was transported to Rio Grande 24 Hour Emergency Care for further evaluation.

Sept. 23

11:52 a.m.: A disabled veteran confronted a staff member who has been parking in a handicapped parking space without a permit. At a later time, she called dispatch to report the staff member. The student said the staff member should be required to register her vehicle just like everybody else.

Sept. 24

is using the income information from a prior year," Garcia said.

Because the FAFSA will ask for older income tax and information, students will already have done their tax returns by the time they fill out the FAFSA, the fafsa.edu.gov states.

"It should benefit the students because now they really can do their FAFSA a lot earlier," Garcia said.

Students are going to be able to use IRS data retrieval, which on the FAFSA, allows them to input information directly from their tax return into the application, she said.

"If the income changes, let's say that the income for 2016 is significantly lower than the income for 2015, in that case, in the financial aid administration,

there has always been an opportunity to where students and families can talk to a financial aid adviser and then based on the information, the financial aid adviser can make a change to the FAFSA," Garcia said.

She encourages students to try to complete the FAFSA as soon as possible.

"With the financial aid process, completing the FAFSA is not the end of the process, it is only the beginning, meaning that many times students have to submit additional documentation, and so then the process can become quite lengthy," Garcia said.

The earlier students start the process, the more time they will have to take care of anything that they need to take care after the FAFSA, she said.

Have you been kind today?

World Smile Day continues to reach millions around the world

SARAH CARVAJAL/THE RIDER PHOTOS

“I like to smile because I have a lot of blessings in my life and it just makes me really happy.”
Paloma Flores, pre-dental biology junior

Brenda Garza
THE RIDER

Harvey Ball, an American commercial artist from Worcester, Mass., created the world’s first smiley face in 1963 and on Friday, millions around the world will celebrate World Smile Day because of his devotion to help people have a nice day.

His smiley face creation brought happiness and good cheer to many people around the world and in 1999, the first ever World Smile Day was introduced, according to world-smileday.com.

Since then, every first Friday in October, World Smile Day is celebrated in Ball’s hometown and around the world. The World Smile Day message is to do an act of kindness and help at least one person smile.

However, Ball only introduced the concept after he believed that his image was losing its identity and symbolism through over-commercial-

“Well when you see some, and it’s just them and you, and they smile at you, it kind of brightens your day, so that’s why I smile.”
Andres Cervantes, mass communication junior

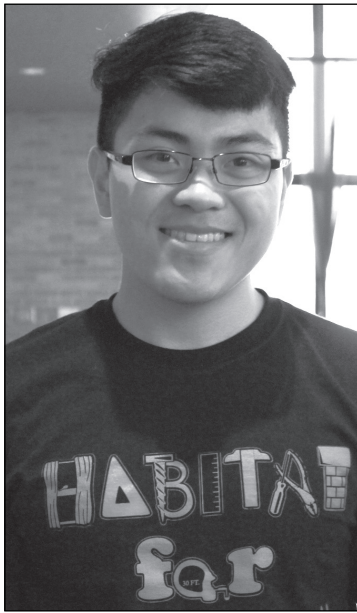

ization. Concerned, the idea emerged to have an annual celebration to promote acts of kindness.

The smiley face creator thought that every single person in the world should devote a day out of the year to make people smile and do acts of kindness.

“The smiley face knows no politics, no geography and no religion,” the website states.

Operation Smile is one of the many organizations that seek to make children who suffer from cleft lip or cleft palate smile again, no matter their situation.

“At UTRGV, the Operation Smile club became the first university-based club in Texas. It was established in the 2016 spring semester and helped

“I like to smile because I’m grateful for the life that’s been given to me today; and life’s too short to not smile every day.”
Joshua Patiño, pre-medical biology senior

raise \$1,440,” said Lesley Robles, co-founder and president of UTRGV’s Operation Smile club. “The club’s main goal was to raise enough funds to cover six surgeries.”

This semester, the organiza-

“What makes me smile would happen to be my dad for all the sacrifices he has made from raising two kids on his own. He always seems to ask me about my day and reminds me to be the person I am.”
Amber Huizar, pre-dental biology junior

children who are about to go into surgery and are used by the doctors to explain the procedure,” Robles said.

Lilly Villarreal, a pre-medical biology sophomore, attended the event and spoke about living with cleft lip.

Villarreal’s testimony made everyone aware that though she is different; she is the same as everyone else. The scar does not define her, and she is willing to talk about her experience to anyone who asks.

“I connected [with her story] because I have my own cousin that has a cleft and went through the same procedures,” said Amber Huizar, a pre-dental biology junior and secretary of the Operation Smile club. “Sharing her point of view reminded me of my own cousin and it motivated

“I smile because life doesn’t have to be perfect to be wonderful.”
Alfonso Basilio, mechanical engineering senior

me more to be more involved and make sure we raise a good amount of money to provide those free surgeries.”

Since 1982, Operation Smile has targeted the children in poor regions of the world and anyone seeking their help. The globalized organization has provided free surgeries to hundreds of thousands of children from more than 60 countries.

“In honor of World Smile Day, Operation Smile and our supporters are raising funds to help create 150 new smiles for children in Ghana,” Julie Brumana, Operation Smile’s student programs associate of the U.S. Western region, wrote in an email.

Kathy Magee, co-founder and president of Operation Smile, stated on operationsmile.com that she believes that every child with a facial deformity is of concern. “If we don’t take care of that child there’s no guarantee that anyone else will.”

For more information, visit www.worldsmileday.com and www.operationsmile.org.

“ At UTRGV, the Operation Smile club became the first university-based club in Texas. It was established in the 2016 spring semester and helped raise \$1,440.

Lesley Robles
Operation Smile Club President

tion created awareness and provided an outlet for community service by hosting the second Smile Dolls event, held Sept. 23 in the University Ballroom on the Edinburg campus.

About 100 people attended the event and more than 80 dolls were donated.

“The dolls are given to the

UTRGV to buy old Guard armory

Land to be used for campus expansion

OSCAR CASTILLO/THE RIDER

UTRGV has started the process of buying 3.603 acres of land and three buildings located at 340 Porter Dr., across the street from Brownsville Early College High School and adjacent to the Texas Southmost College Recreation Center parking lot.

Oscar Castillo
NEWS EDITOR

The University of Texas Rio Grande Valley is in the final stage of purchasing 3.603 acres of land, which includes the Armory Complex, for \$1,010,000 from the City of Brownsville.

“I understand the City of Brownsville was going to have final authority to execute the contract from the city commission, and once that approval was obtained, then the city would sign the contract and we would move toward closing,” said Mark Saenz, UTRGV’s chief real estate and space planning officer. “Closing typically takes up to 60 days.”

The Brownsville City Commission approved the sale on Sept. 20.

The Armory Complex is located at 340 Porter Drive, across the street from Brownsville Early College High School and adjacent to the Texas Southmost College Recreation Center parking lot.

“At the moment, there was a small police presence, so they were using it for a training facility,” said Ramiro Gonzalez, assistant director of planning for the City of Brownsville, about the current use of the Armory Complex. “Before that, it was actually the Army National Guard that moved out to the expressway.”

The Texas Army National Guard recruiting office is now located at 600 Woodruff Ave. in Brownsville.

Asked what UTRGV will use the building for, Saenz replied: “That is unknown at this time, just for future campus expansion.”

The \$1,010,000 land purchase, which the university had appraised, will include 3.603 acres of land and three buildings of about 20,531 square feet combined, Saenz said.

“We’re anticipating it will be 60 to 90 days before ... ownership transfers,” Gonzalez said.

Campus Q&A

What is your favorite NFL team? Why?

“The Philadelphia Eagles because my dad, back in the day, was from Mexico and he didn’t know anything about football and so when he came to the States, the first game he watched was an Eagles game and so he kind of just decided to follow them. So, I was raised as an Eagles fan.”

Daniel Rodriguez
Computer science freshman

“Denver Broncos. [I’ve] been following them ever since Peyton Manning moved over there. Obviously, he retired and we still got a dominant team. We’re 3-0 right now and they’re not ranked No. 1 in the NFL but I think they should be ranked No. 1. I mean, they haven’t lost.”

Colton Bostler
History sophomore

The San Francisco 49ers because Cowboys are too mainstream, that’s for sure. 49ers have about five Super Bowl wins; they have a good record. Right now, they are not as good as they used to be, but I believe that they are going to have a great comeback this season. Colin Kaepernick, he is all right. He stands for good stuff. Many people have judged him for not standing up during the pledge this season but it’s all right. It’s in the constitution, freedom of speech. He can do whatever he wants and he is standing up for something good and they are just an overall good team.

Luis Lopez
Mass communication sophomore

“My favorite team is the Houston Texans because I’m from Texas. I grew up watching them and my family goes for them, too. I also like J.J. Watt.”

Laura Van Tilberg
Kinesiology senior

--Compiled by Ana Cahuiche and Gabriel Mata

Not all work, not all play

Clarissa Martinez
THE RIDER

During my first year of college, in one of my lecture classes, a student walked in with a DVD. I don’t remember what movie it was, but I remember that it was an animated film. He sat down two seats away in the same row and struck up a conversation with the student between us. When the first student said he was borrowing the DVD from a friend, the other student said, “Oh, I don’t watch kids’ movies.”

This small comment has managed to stay with me. It echoes in my head every time I see what’s showing at Cinemark. I push it to the back of my mind when I spot “Rio” on Fox, or when Free Form (formerly, ABC Family) holds its ritual Harry Potter weekend.

I don’t know why I let that remark get to me. It’s only a difference of opinion. The student wasn’t trying to put the other student down. And the student was definitely not attacking me. However, somehow, I have allowed that one remark to denote my maturity. As if being a college student automatically forces you to not like cartoons or “kids’ movies.”

That notion is ridiculous.

While I know I have plenty of growing up to do, I still know when it’s appropriate to set aside my playfulness and replace it with a level head.

“Maturity does not mean that one has to be serious all the time. Believe me. It’s only a percentage of the human demeanor.”

When I’m with family, I can be the silliest, most annoying person ever. I’ll gladly embarrass my 15-year-old cousin at H-E-B by dancing to the music playing in the store. I’ll repeat the words my relatives say like a parrot, mostly in song. I have marathoned the cartoon “Avatar: The Last Airbender,” and I think I should do that again soon.

At school I am the same way, but my mind is already on a million other things. Sometimes, my personality goes to sleep as I go about my day. As the sun sets on a Wednesday night, I get more serious. My maturity levels take over when I’m in the zone on an assignment.

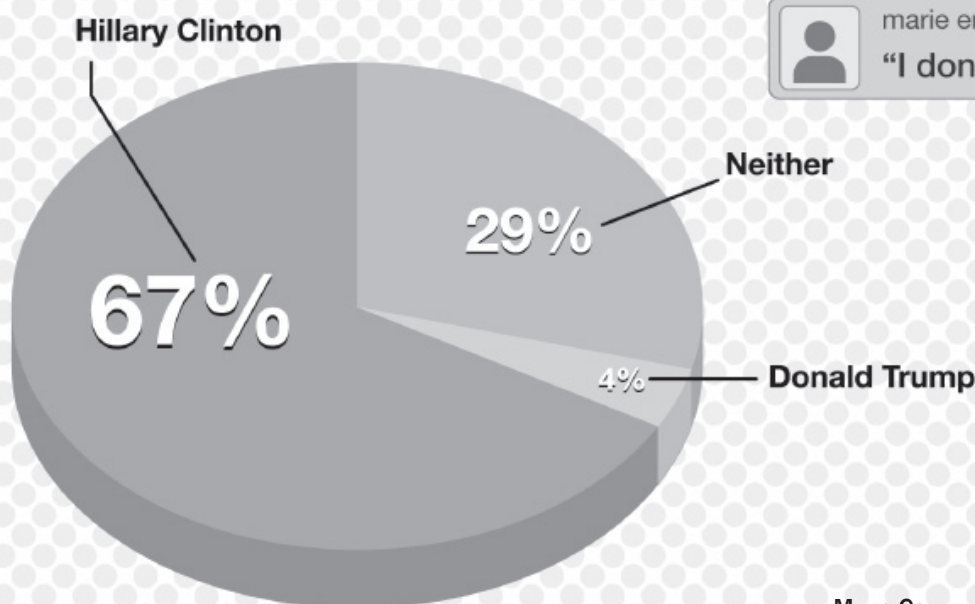

Maturity does not mean that one has to be serious all the time. Believe me. It’s only a percentage of the human demeanor.

Maturity just means that one has to adapt to certain situations correctly for the best outcome. It’s learning to say no. It’s about questioning the pros and cons. It’s about discussion, understanding, compromise and being the better person.

One can be those things while de-stressing on a Friday night with too much wine. One can be all those things, and absolutely hate it. One can be all those things in all aspects of their life, except when it comes to discussing which place in town has the best tacos.

The point of all this is that it is perfectly fine to not like animated films. It is perfectly fine to love them. It is not perfectly fine to tell someone they shouldn’t be watching them because they’re in college already; there’s no maturity in saying that.

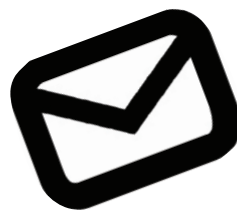

The Rider Online Poll: Who won the first 2016 presidential debate?

marie erwin - Sept. 27
“I don’t like either”

Alumni: Where are they now?

Name: Heriberto Reynoso
Age: 28
Hometown: Brownsville
Degree: Bachelor of science in computer science
Graduation year: 2011 (UT Brownsville)
Current job: CEO and founder of Reybotics
How would you describe your college years? “I was doing internships and flying around the nation. I was bringing in scholarships and I was enjoying my education there. While I was there, I had projects on the side, so I was intertwining what I was learning into my projects at home. It wasn’t just about reading textbooks, it was about applying what I was learning to my projects.”
What were your favorite things to do while in college? “My brain was really starving for knowledge. The ability to just drop in on my professors, not just in my degree, but also from other departments and just pick their brain. I know some students will think that’s dumb, but for me, I was curious because at first, I was a mechanical engineer [major] and in physics as a freshman, and then after speaking to professors in different fields, I got a taste of each field and ultimately went for computer science. Students are so afraid to tap into the wealth of knowledge that is at their fingertips. Surrounding myself with these professors and their field got me to where I am today.”
What do you miss most about college? “Being able to mingle with high-intellect individuals.”
What motivated you to pursue your degree? “I didn’t know what degree to pursue because I was all over the place. I wasn’t just building the robot; I was wiring them up, but I wasn’t really programing as much as I wanted, so I was lacking in the programming

PHOTO COUTESY HERIBERTO REYNOSO

department. So, that’s exactly why I chose computer science.”
Briefly describe what you do in your job? “Sole purpose is to engage youth in STEM-related activities, whether during the summer or throughout the year. Currently, we have an ongoing contract up with the Weslaco Independent School District to develop a pipe inspection robot for the City of Weslaco. The students

will develop these robots from concept to actualization to find out where the problems are because they go through a lot of flooding year-round. This will be a way to pinpoint the problems instead of replacing things.”
What experience have you had that you would say is out of the ordinary? “Being able to work on the next mission to Mars. I took a job to work for NASA’s Jet Propulsion Laboratory in north L.A. and for me, that was a dream come true. That’s something I have been wanting to do since I first went to NASA, but I took that job knowing it would lead me to the better job, which it did and I got the opportunity to work on an actual Mars Rover and do codes for a multimillion-dollar Mars Rover.”
What is the most memorable moment of your career? “When I was at NASA, I would sit at some random table and start conversations with these old, old, white-haired engineers that would work on the Apollo missions--they sent us to the moon--and then have them talk about their role in it. To me, that was just an eye opener.”
What motivates you? “I didn’t have a mentor or someone to push me. Some students don’t have a role model, so I try to be that role model for the thousands of students in the Valley who don’t have a parent, aunt or uncle who is an engineer or scientist. They see those fields, but they seem so far-fetched, like I used to see it back in 2003. I would tell myself, ‘Yeah right, I’ll never work at NASA.’ So, when I get up in the morning, as long as I inspire one person today, I’m happy.”
What’s next careerwise? “My goal is to one day develop systems that are just as smart as humans. We are lacking milestones in that department and that’s

See **ALUMNI**, Page 10

5 worst phobias, according to college students

Sergio Garcia
SOCIAL MEDI EDITOR

The Rider randomly surveyed 40 UTRGV students from the Brownsville and Edinburg campuses.
A phobia is a strong irrational fear of something that poses little or no harm. Some of the

effects of phobias include, but are not limited to, rapid heartbeat, trembling and anxiety attacks.
1. Arachnophobia
Arachnophobia is the fear of any type of arachnids. People who suffer from this disorder often perceive these creatures as bigger than they actually are.

2. Coulrophobia
Red nose, face painted white and crazy hair, this phobia comes from one thing that might represent happiness to many, clowns. The prefix “coulro” derives from the Greek word that means “one who goes on stilts.” Even though it’s not an official diagnosis, coulrophobia

is real for many people.
3. Atychiphobia
From not being top of the class to losing a baseball game, atychiphobia is the fear of failing. Students expressed how this becomes real once they enter college, especially because they feel like they have expectations to meet, so failure

is not an option.
4. Acrophobia
People with this phobia might dislike the Burj Khalifa and the Shanghai Tower, which are two of the tallest buildings on Earth. Acrophobia is the abnormal fear of heights.

Members of the Texas Freedom Network include (front row, from left) Nina Zamarripa, Rene Jane, Ofelia Alonso, Marlaina Vela and Scarlet Urbin. Second row: Sandra Barba, Sarah Godwin, Omar Casas and Ana Hernandez. Back row: Field organizer Ruben Garza, Monica Varela, Jacob Ramirez, Gill Agustin, Kevin Galaviz, Kristian Nepomuceno, Gabe Galvan and Rejo Reta.

Club Spotlight

Name: Texas Freedom Network–Edinburg and Brownsville
Purpose: Students work to protect religious freedom, defend civil liberties and strengthen public schools.
President: Ramona Luna
Vice President: Omar Casas
Secretary: Juan Villela
Treasurer: Renee Jane
Adviser: Mark Kaswan, UTRGV political science professor
Activities: Registers voters, participates in local activism and protests, educates students on reproductive health/justice, LGBTQIA workshops and creates coalitions with other national/local organizations.

Meetings: First Friday of every month. Location and time varies.
Membership requirements: None

FAFSA ahora disponible

Nubia Reyna
THE RIDER

La Solicitud Gratuita de Ayuda Federal para Estudiantes (FAFSA por sus siglas en inglés) del año 2017-2018 ya se encuentra disponible, tres meses antes que en años anteriores.

Adicionalmente, estudiantes podrán usar la información de sus impuestos federales (income tax) del año 2015 para llenar su solicitud, de acuerdo a la página oficial, fafsa.ed.gov. Por ejemplo, para la solicitud del año 2017-2018, los estudiantes reportarán las declaraciones de impuestos federales del 2015 en vez de la información del 2016.

La solicitud se hizo disponible el sábado.

Los cambios se implementaron porque en el pasado, aunque se alentaba a los estudiantes a completarla lo antes posible, la solicitud no se hacía disponible hasta enero y la información de impuestos federales que tenían que usar era la del año actual, la cual, apenas completarían en febrero, dijo Jael García, directora asociada de Operaciones de Ayuda Financiera y Enlace Comunitario.

“La razón por la que se cambió es, básicamente, porque había una desconexión de cuando

Diseño de anillo de graduación se encuentra en revisión

Andrea Torres
THE RIDER

Con la ceremonia a menos de tres meses, los estudiantes de último año se preparan para comprar su toga y birrete, y a partir de este semestre, también el primer anillo de graduación de UTRGV.

“Definitivamente, algo que se vea bien hecho,” dijo Saire Moreno, estudiante de diseño gráfico, acerca de cómo le gustaría que luciera el anillo. “Definitivamente, que represente todo lo que hice en la universidad”.

Como ya fue reportado por *The Rider*, el comité oficial del anillo de UTRGV recibió más de 800 respuestas en la encuesta de sugerencias sobre el diseño del anillo, administrada el 5 de febrero por la Oficina del Vicepresidente Ejecutivo de Finanzas y Administración.

La encuesta estuvo disponible hasta el 19 de febrero y más del 70 por ciento de los participantes fueron estudiantes, dijo Letty Benavides, vicepresidenta adjunta de Servicios Auxiliares del Campus y presidenta del comité.

Benavides dijo que un miembro del comité y profesora de arte, Donna Sweigart, es la diseñadora creativa principal del anillo y especialista en joyería. Sweigart asignó a su clase la tarea de ayudarla a crear el diseño.

Miembros del comité del anillo incluyen a la presidenta de la Asociación de Gobierno Estudiantil, Denisse Molina-Castro; al director de Residencia Estudiantil, Sergio Martínez; a la directora de Actividades Estudiantiles, Cindy Mata-

Gloria Reyes, estudiante de último año de arte de estudio, trabaja en un anillo en clase de la profesora Donna Sweigart el pasado miércoles en el anexo de artes visuales en Edinburg.

Vásquez; al vicepresidente de la Asociación de Gobierno Estudiantil en Edinburg, Peter Averack; al senador de la Colegio de Negocios y Emprendimiento en Edinburg, Alberto Adame y a la directora ejecutiva de Relaciones con Egresados, Isis López.

El pasado semestre de primavera, alrededor de 25 estudiantes en las clases de joyería intermedia y joyería avanzada de Sweigart fueron asignados la tarea de crear los diseños preliminares del anillo.

“Lo primero que hicimos fue hacer una investigación y ponderar todos los aspectos

del Valle”, dijo Sweigart. “Es algo que significa mucho para todos nosotros. Los estudiantes de mis clases son de todos los alrededores del Valle. ... Hicimos una investigación holística e histórica del Valle

como tal”.

Los estudiantes están trabajando con la manufacturera de anillos Jostens para producir dos diseños de anillos, los cuales serán presentados el martes o el miércoles a un grupo de enfoque, dijo Benavides. El grupo consiste del equipo ejecutivo de SGA (por sus siglas en inglés).

“Queremos mantener el grupo reducido”, dijo ella. “La razón por la que nos enfocaremos en el equipo ejecutivo de SGA es porque, obviamente, representan al cuerpo estudiantil”.

“Debería beneficiar a los estudiantes porque ahora pueden llenar su solicitud FAFSA mucho antes de lo normal”, dijo García.

Los estudiantes podrán usar la herramienta de recuperación de datos del IRS, la cual les permite transferir datos directamente de sus declaraciones de impuestos federales a su solicitud, dijo ella.

“Si su ingreso cambia, digamos que su ingreso del 2016 es significativamente más bajo que el del 2015, siempre habrá oportunidad para que ellos y su familia hablen con un asesor de ayuda financiera para hacer algún cambio a su solicitud de acuerdo a su información, aquí en la administración de ayuda financiera”, dijo García.

Ella exhorta a los alumnos a completar su solicitud lo antes posible.

“Con el proceso de ayuda financiera, completar la solicitud de FAFSA no es el final, sino el principio, ya que muchas veces los estudiantes tienen que entregar documentación adicional, lo cual alarga el proceso”, dijo García.

Entre más rápido los estudiantes puedan iniciar el proceso, más tiempo tendrán para completar lo que les haga falta para su solicitud de FAFSA”, dijo ella.

Si el grupo de enfoque decide alterar el diseño, podría atrasar la fecha de revelación, pero Benavides dijo que la meta es tener el anillo disponible para los graduados de este semestre.

“Con suerte, todos vamos a acordar en el mismo”, dijo ella, “para que luego, el comité oficial del anillo haga una recomendación final al presidente”.

Una vez que el diseño final sea aprobado, Benavides dijo que el comité planea en publicar el diseño oficial a la comunidad del campus durante este mes para que los alumnos puedan adquirirlo en noviembre.

Entre los estudiantes que están trabajando en el diseño con Jostens, está Vilma Flores, estudiante de último año de sociología y arte de estudio.

“Creo que es maravilloso que los estudiantes podamos participar en algo tan grande y tan especial”, dijo Flores. “Esto es algo que es para nosotros. ... Sentimos que era muy importante construir algo que todos podemos disfrutar y sentirnos orgullosos al respecto”.

Otros estudiantes en la clase de Sweigart que se encuentran en las etapas finales del diseño son Fabian Pedraza, Daniel Hernández, Oscar Padrón, Gloria Reyes y Lino Guiza.

Flores también asistió en el diseño de otros artículos de graduación de UTRGV, tales como la maza ceremonial y el medallón presidencial, como parte de la clase de Sweigart.

El precio del anillo está por determinarse.

The winds of change

Both tennis teams under new leadership

Nathaniel Mata
SPORTS EDITOR

Last May, UTRGV women's tennis made history in Brownsville. It became the first program to win a team Western Athletic Conference Championship and qualify for the NCAA tournament.

It's only a few months later, and the women's tennis team looks a lot different than the championship squad of last spring. The program graduated three in its lineup from a year ago, including Reagan Greenwood, who was matched with the top opponents on a match to match basis. They also lost Natacha Minc, who transferred to the New Jersey Institute of Technology.

Possibly the biggest change comes at the head coaching position. First-year Vaquero Head Coach Stephanie Wooten-Quijada resigned from her position following the successful season to take the head position at the University of New Mexico.

Less than a month later, the new head coach was selected. Sonia Hahn joins UTRGV after spending the previous 19 seasons as co-head coach at the University of Tennessee. Hahn brings experience from the Southeastern Conference, in which Tennessee accumulated a 122-95 record in conference matches under her leadership.

Even though a lot has changed since last spring, Hahn still hopes to look toward the leadership of returning team members.

"The returnees, I'm still getting to know them and getting to see their games. But what I see I really like," said Hahn, a former University of Kentucky standout. "I think they bring experience to the table. They won a conference championship last year, so they understand what it takes to win. I'm hoping that they'll be able to pass that knowledge on to the young ones that are here."

The new head coach is trying her best to hit the ground running after her late summer hire.

"It's definitely a whirlwind and it's continued to be one, so far," Hahn said. "I'm starting to understand the system a little bit better and that's just gonna take some time."

As for the returnees Hahn will look toward? There are four of them: two in their sophomore year, Tara Donaho and Dominique Ibarra. The two juniors, Dominique Esparza and Doris Aleksovska, represent the only upperclassmen on the eight-member roster.

MEN

For the men's tennis team, things are changing as well, again. Over the last three seasons transition is about the only thing that's stayed constant.

This fall, the third head coach in three years will take over the program. Dann Nelson is the new bench boss of the tennis team, replacing Brett Bernstein after less than a year.

Elliot Johnstone, who is a junior in his third year, meaning

LESLEY ROBLES/THE RIDER

Management sophomore Andres Hernandez serves the ball during practice last Wednesday at the Orville I. Cox Tennis Center in Edinburg.

“Each different coach has their own technique, own tactics, own mentality, so it’s good to hear from different people. Just hopefully, he stays for [my] last year, as well, to get two years in a row.”

Elliot Johnstone
UTRGV Junior

he's had a new coach at the start of every year he's been in Edinburg. The Australian continues

to play his game, learning from each coach.

"You want to get used to the

first and get to know them, then they go on," Johnstone said. "Each different coach has their own technique, own tactics, own mentality, so it's good to hear from different people. Just hopefully, he stays for [my] last year, as well, to get two years in a row."

Tennis will also have to cope with losing its best player over the past couple of years, Juan Cruz Soria. Without Soria on the team, UTRGV will be without a senior, putting a premium on leadership from juniors Johnstone and Koby Jansen.

"There's two juniors on the team, Koby, who's actually injured now, so it's hard for him to show leadership on court. So I got to show a bit of responsibility and take the [underclassmen] under my wing," Johnstone said.

Coach Nelson joins the Vaquero staff after spending his last 11 seasons at Southern Illinois University. He leaves SIU as its second winningest coach in program history.

"I was at SIU for 11 years and was used to things. But things change, life happens and I'm here now and I'm excited to be here now," Nelson said.

His energy will have to be divided among a few different tasks this fall. He will need to add members to the tennis team to flesh out the roster that has only five players.

"We do have a small roster, but hopefully it doesn't stay like that," the new head coach said. "I'm working hard to bring new guys in and look at the talent that's already here. In the fall, we need to get our conditioning levels up. We're spending a lot of time getting our rhythm back. We need legs and we need lungs in the fall to get ready for the spring."

It will be a year to overcome adversity for sure but men's tennis will have this semester to get into form for the most important part of the year, conference in spring.

GABRIEL MATA/THE RIDER

Sophomore Dominique Ibarra returns a ball during practice last Tuesday at the Orville Cox Tennis Center in Edinburg. She is one of four returning players from the 2015-16 WAC championship team.

ATHLETE OF THE WEEK

LESLEY ROBLES/THE RIDER

Name: Sarah Bonney
Sport: Soccer
Position: Forward
Classification: Freshman
Major: Business

Age: 21

Hometown: Winneba, Ghana

Who is your favorite athlete? "My favorite athlete is [Leonel] Messi."

Who is your role model?

"Marta [Vieira da Silva] because I want to play like her and reach the level she's gotten to in *fútbol*."

When did you begin playing soccer, and why? "I was very little. My parents wouldn't encourage me because I was the only girl, but as I grew, I became adamant. Sometimes I would run away from home and I would go to the soccer complex to hide and practice on my own. So, I was just little, but when I was 3 they didn't allow me to play, but when I got of age, and I realized what was good from bad, I made a decision myself. I would say, like, 10 years of playing active soccer."

What's your favorite place to hang out on campus? "I don't know many places, but I guess the [soccer] field. I don't really have a special place that I go."

What are your academic goals? "I hope to get a higher GPA."

How do you feel about being part of this team? "I'm very happy. I'm glad because being in this country puts me one step ahead in my life. So being in this particular team, too, is also a big step for me because the *fútbol* I used to play in my country is lower than the level compared to here, so it's like, I've moved ahead in life. So, I'm very happy taking that step."

What are your personal goals for this season? "Score more goals for my team and make the team go forward in the conference."

RING

CONTINUED FROM PAGE 1
assistant vice president for Campus Auxiliary Services and chair of the committee.

Benavides said a member of the committee, Associate Art Professor Donna Sweigart is the lead creative designer of the ring and specializes in jewelry. Sweigart assigned her class to help create the design.

Members of the ring committee include Student Government Association President Denisse Molina-Castro, Residence Life Director Sergio Martinez, Student Activities Director Cindy Mata-Vasquez, SGA Edinburg Vice President Peter Averack, College of Business and Entrepreneurship Senator (Edinburg) Alberto Adame and Alumni Relations Executive Director Isis Lopez.

Last spring semester, about 25 students in Sweigart's Intermediate Jewelry and Advanced Jewelry classes were assigned to create preliminary ring designs.

"The first thing we did was research and we looked at all the aspects of the Valley," Sweigart said. "It is something that actually means a lot to us. The students in my class were from all over the Valley. ... We took a holistic, historical research of the Valley as a whole."

Students are working with ring manufacturer Jostens to produce the two ring designs, which will be presented Tuesday or Wednesday to a student focus group, Benavides said. The group consists of the SGA executive team.

"We want to keep the group small," she said. "The reason why we focus on the SGA executive team is, obviously, they are the representatives of the student body."

If the focus group decides to alter the design, it may push back the reveal date, but Benavides said the goal is to have the ring available for this semester's graduates.

"Hopefully, we're going to agree on the same one," she said. "Then, of course, taking those recommendations, the official ring committee will make a final recommendation to the president."

Once the final design is approved, Benavides said the committee plans to release the official design to the campus community later this month and students can buy their ring in November.

Among the group of students who are working with Jostens on the designs is Vilma Flores, a sociology and studio art senior.

"I think it is really amazing that they allowed students to participate in something so big and something so special," Flores said. "This is something that's for us. ... We felt that it was really important to build something that we would all enjoy and we felt proud of."

Other students in Sweigart's class assisting in the final stages of design are Fabian Pedraza, Daniel Hernandez, Oscar Padron, Gloria Reyes and Lino Guiza.

Flores has also assisted with the design of other UTRGV commencement items, such as the UTRGV ceremonial mace and the presidential medallion as part of Sweigart's classes.

The price of the ring is still to be determined.

--Brenda Garza contributed to this report.

CARRY

CONTINUED FROM PAGE 1

with a weapon."

"As far as buying a gun, you can go to gun shops, Academy or any type of sporting goods store," he said.

In an interview with *The Rider*, Communication Professor Louis Falk said that the law is not an issue, it was passed and now we have to learn how to deal with it.

"Everybody was protesting and everybody was going to all those events and people in Austin, the professors [saying], 'No, we're not going to have it in our campus.' That was all too little, too late," Falk said. "If they wanted to protest they should have done it before that."

Hugo Rodriguez, UTRGV assistant professor for Health and Biomedical Sciences, said he does not agree with campus carry.

"Anger and anxiety makes us to do not the right decisions," Rodriguez said. "When we have access to a weapon, it could be, sometimes, a disaster."

Kimberly Rosas, an English senior on

the Brownsville campus said that she does not agree with the campus carry law.

"I don't think it's justified to be able to carry a gun," Rosas said. "I don't think it's secure."

Munguia said people who are carrying concealed guns are not the ones to worry about because they have already gone through the vetting process.

Vetting is the process of performing a background check on someone. The process may include looking for prior convictions, verifying licenses and checking employment history, according to the DPS website.

"The ones to worry about are the ones that have bad intentions, the ones that had not gone to the training and the ones that are carrying a gun illegally," Munguia said.

Javier Espinoza, range master at the South Texas Tactical Weapons shooting range, offers a concealed carry course.

"The majority of the clientele that take the concealed carry course are senior citizens, college students and females that are working in a medical field,"

Espinoza said.

He said the average cost of the course is \$100 and the background investigation conducted by the Texas Department of Public Safety is about \$147.

The department sets out requirements that must be met in order to apply for a license to carry.

"In order to obtain a license to carry a concealed arm, you must be a Texas resident, you must be 21 years of age and you cannot have any felonies or any class A misdemeanors in regards to family violence," Espinoza said.

Chief Munguia said that "open carry" is not allowed on both campuses.

Under the open carry law, which went into effect last January, individuals with a license may carry a holstered handgun openly in all locations that allow the licensed carrying of a concealed handgun.

"If you see [open carry], call us because that is a violation of the law," Munguia said. "Even for permit holders, you cannot have a visible weapon."

Students who see a gun in plain sight may call University Police at 882-8222 on the Brownsville campus and 665-7151 on Edinburg campus.

ALUMNI

CONTINUED FROM PAGE 5

exactly why I chose computer science. It's lacking in milestones and right now, I'm contributing milestones in this field."

What advice do you have for anyone pursuing your degree? "They need to realize that there's a lot of opportunities beyond the horizon that they might not be aware of. Simply by searching 'scholarships for Hispanics' on Google, you're going to find a plethora of these opportunities. There is no excuse to not apply for scholarships. For you to grow as a professional, you have to get out of your shell."

5. Achluophobia

Are you irrationally scared of the dark? Well, you might suffer from achluophobia. This phobia is also related to nyctophobia, which is defined as the same. They both derive from the thought that the brain panics when trying to figure out what would, or could, happen in somber or pitch-black places.

"I encourage students to seek help and

ask questions about any anxiety disorders that they may feel concerned about and also to have a support system in place where they are open about sharing what they feel and how that impacts them on a daily basis," said Erika Perez, a UTRGV lecturer and licensed professional counselor-intern.

An ode to fine arts

ANA CAHUICHE/THE RIDER PHOTOS

Baritone and UTRGV Associate Professor Daniel Hunter-Holly, accompanied by Lecturer Allan Armstrong, performs a series of musical pieces based on poems that were inspired by famous artworks last Tuesday in the Texas Southmost College Arts Center in Brownsville. The multimedia recital “A Question of Light” consisted of three sections containing Faure’s and Debussy’s settings of Paul Verlaine, Francis Poulenc and Paul Eluard’s tribute to 20th century masters Picasso, Chagall and Miro, poems by Gene Scheer and music by Jake Heggie.

Jennifer Cahn, head curator at the International Museum of Art & Science in McAllen, was the raconteur for the presentation “A Question of Light” last Tuesday in the Texas Southmost College Arts Center in Brownsville. The event formed part of the Faculty Artist Series and was hosted by the Patron of the Arts.

SPACE X

CONTINUED FROM PAGE 1

sustainable species, Musk estimates that 1 million people are needed in Mars.

“If you have 100 people per ship, that’s 10,000 trips,” he said.

It would take from 40 to 100 years to achieve a self-sustainable civilization in Mars at the rate of 20 to 50 total trips.

“The trip time at 6 kilometers per second is as low as 80 days,” he said. “Over time, they’ll improve that as low as 30 days.”

Once the spaceship arrives to Mars, it will use “supersonic retropropulsion,” which means that the ship is going to land by using its engines to lower itself to the ground. After leaving the passengers, the ship will come back to Earth.

Since the engines of the ship run on methane. The gas can be made from the carbon dioxide available in Mars.

The cost of the trip is \$10 billion but Musk plans on lowering it to \$200,000 a ticket, thanks to reusability and propellant, as well as having 200 people per ship instead of 100.

“The goal is to ship 100 passengers per ship, although, you’ll probably see it go to 200 or more,” Musk said. The ticket price could come down to “maybe as little as \$100,000 over time, depending upon how much mass a person takes.”

Asked who would be Mars colonizers, Musk replied that it had to be people that are mentally prepared to die.

“I think the first journey to Mars is going to be very dangerous. It’d basically be, ‘Are you prepared to die?’” Musk said. If so, “OK, you’re a candidate for going. This is less about who goes first. ... It’s about making a self-sustainable civilization on Mars as fast as possible.”

On the way to and on Mars, the chances of getting cancer increase slightly due to the tiny energized particles that are in deep space, and it is still not known what effects this will have on the body.

“There is going to be some risk of radiation, but it’s not deadly,” Musk said.

He described some ways that Mars colonists could shield themselves, such as “reorienting the spaceship during a solar flare and huddling under a column of water.” Musk said the radiation risk is often brought up, but he thinks that it is not “too big of a deal.”

In order to entertain the colonizers in the ship for more than 80 days, Musk said he wants to set up the spaceship’s crew compartment in order for passengers to play zero-gravity games and watch movies.

“It will be, like, really fun to go,” Musk said. “You’ll have a great time.”

Even though Musk did not give details about how people would breathe, live and eat on Mars, he said colonizers could grow plants on Mars “just by compressing the atmosphere.”

In the presentation, Musk said one of the possible launch sites could be the SpaceX facility that is being built near Boca Chica Beach in Cameron County.

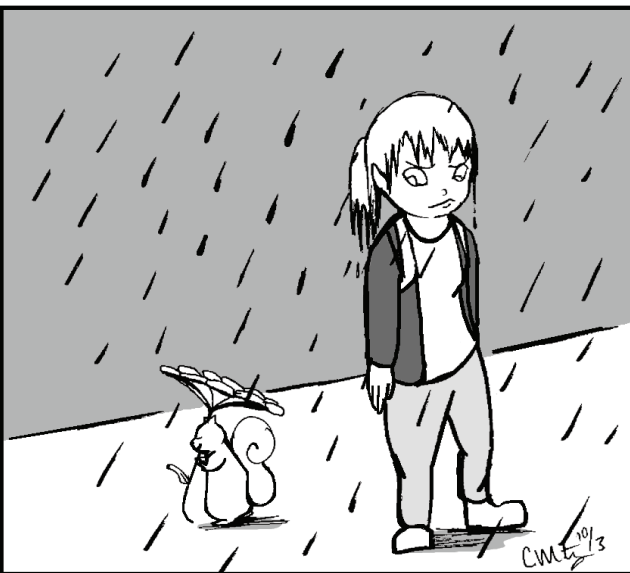

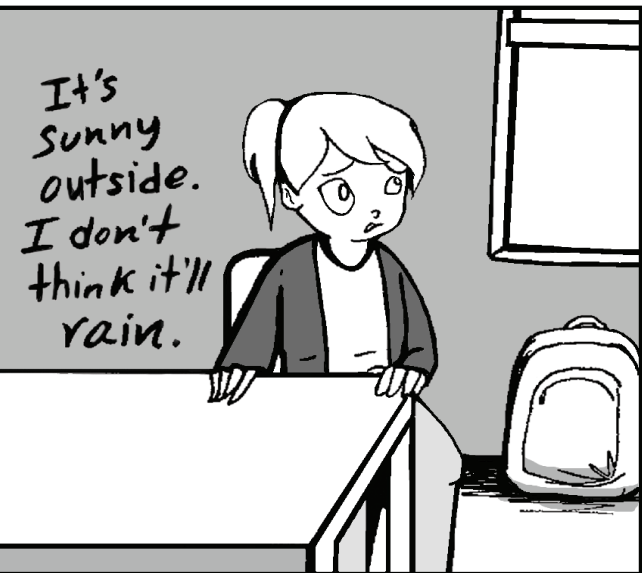

“In the future, we expect to add additional launch locations; probably, we are adding one on the south coast of Texas,” he said.

Musk hopes that the structure development is going to be completed in 2019, sending the first spaceship to Mars in 2024.

“Ultimately, I’d suspect you’d see Mars transit times of as little as 30 days in the distant future,” he said.
